

The Computer Forensic Series by EC-Council provides the knowledge and skills to identify, track, and prosecute the cyber-criminal. The series is comprised of five books covering a broad base of topics in Computer Hacking Forensic Investigation, designed to expose the reader to the process of detecting attacks and collecting evidence in a forensically sound manner with the intent to report crime and prevent future attacks. Learners are introduced to advanced techniques in computer investigation and analysis with interest in generating potential legal evidence. In full, this and the other four books provide preparation to identify evidence in computer related crime and abuse cases as well as track the intrusive hackers path through a client system. The series and accompanying labs help prepare the security student or professional to profile an intruders footprint and gather all necessary information and evidence to support prosecution in a court of law. Hard Disks, File and Operating Systems provides a basic understanding of file systems, hard disks and digital media devices. Boot processes, Windows and Linux Forensics and application of password crackers are all discussed.

No, Daddy, Dont!: A Fathers Murderous Act of Revenge, Kabbalah: Selections From Classic Kabbalistic Works From Raziel Hamalach To The Present Day, Preservation of Modern Architecture, The principles of the law of contracts and torts: with a short outline of the law of evidence, being Indermauers common law, re-written and enlarged, The Best Ever Book of Professor Jokes, Penelope Brandling : a tale of the Welsh coast in the eighteenth century, A Family Memoir: The Autobiography of the American Humorist Â«Max AdelerÂ» (American University Studies),
