

Enlarge your breasts? Tighten connective tissue? Increase muscle size and strength? Yes! There are many studies, more being done all the time that show the amazing response that the body has to hypnotic suggestions. Scientific studies show dramatic gains in the size of breasts with follow-up studies of one year later that determine the results are permanent. DO NOT consider breast augmentation surgery or implants until you have tried hypnosis. The risks of breast surgery are too great, and the implants can harden or have to be removed, leaving you with smaller breasts. This is probably one of the most fascinating uses of hypnosis. If you are considering having breast augmentation surgery, please try this first. Many of you are probably very skeptical about how hypnosis could actually enlarge breasts. It seems odd, but once you understand how the mind works, and how easy it is to reprogram the cells with hypnosis, you will find that you actually have a lot of control in the area of making changes in your body. Positive Rating Positive Rating Positive Rating Positive Rating Positive Rating Dear Wendi, It really worked! I did the CDs for breast enlargement, and went from an A cup to a B cup. I recently went to a department store to buy a new bra and was frustrated that nothing was fitting (my normal A size). I have never been able to fit into a B, but I tried several Bs on and they were all a perfect fit. I'm pleased with my new look and want to say thanks! My friend paid \$5000 for breast augmentation and suffered through surgery and recovery. My route with Wendi's program was painless, relaxing and fun (and it worked!). I find myself giggling about when I get dressed in the morning. Please tell Wendi thanks. I look forward to using more of your products. Holly There are several scientific studies included in this script book. Dear Wendi, I went from a B to a C in 2 weeks!! I follow these sessions religiously. The first week I felt some differences in my breasts. At the end of week 2 my bras were getting tight and halfway through week three I knew that I was going to have to purchase the next cup size. I'm soooo excited about this and am going to keep on going and see where I end up size wise. I suggest this to anyone considering breast enlargement!! Why spend thousands to become bigger when you can spend a lot less and have the same results without the pain that comes along with a surgery!!! Definitely a must have in my book!!! ~~ Kimberley
