

This book is about how to end poverty and improve global living standards. Topics include economic growth, income inequality, corruption, sustainable development, future technology, and much more. Below is a list of questions answered throughout this book. Everything is supported by evidence. * How do we measure a country's standard of living? * Which nations have the best living standards? What are they doing right? * Which of the 50 American states have the best living standards? What are they doing right? * What is the purpose of money? Do we need it? * What is inflation? What causes it? Is it a big deal? * How much wealth do we need to maximize the human standard of living? * What is the difference between capitalism and socialism? * Has capitalism failed? * What caused living standards to rise so drastically since 1800? Why did it happen in Western Europe first? Was it capitalism? Technology? Democracy? Fossil fuels? Or something else? * Do we need more regulations on businesses or less? * Which nations have the most business regulations? Do they perform better or worse than those with fewer regulations? * Should nations be more open to free trade? Or should they be more self-sufficient? * Does growing the economy (the GDP) improve a country's quality of life? * What is the purpose of the stock market? Do we need it? * Is taxation a form of theft? * What causes unemployment? * Is it better to have a larger public sector or private sector? * Why is economic growth slowing in developed countries? * Does income inequality harm national living standards? * Are income taxes good or bad? What about property taxes, consumption taxes, and corporate taxes? * Does taxation harm economic growth? * Should we raise taxes on the rich or lower them? * Should we increase or decrease how much we spend on welfare? * How high should the minimum wage be? Or should it be abolished? * What is a basic income guarantee? Would it work? * If we raised taxes on the rich, would they leave the country? Does that matter? * Why is the tax code so complex? * How can we eliminate tax loopholes? * Do we need a new tax system altogether? How would it work? * Can we grow the economy without harming the environment? How? * How do we speed up the transition to renewable energy without harming the economy? * How can we grow food more sustainably? * Are we running out of resources? How do we solve that problem? * How do we address overpopulation? * How do central banks work? Are they helping or hurting the global economy? * Should we print less money? * Should we switch to a gold standard? * Does religion help or hurt national living standards? * Is immigration good or bad? * How high can the debt go? * What is the cause of corruption? How prevalent is it? * How do we get money out of politics? * Is our current political and economic system broken? * Should we implement a direct democracy? Or would that be a tyranny of the majority? * Is the world getting better or worse? * Are we on the verge of a technological revolution? * Will there soon be smarter-than-human artificial intelligence? * Will we put machines in our bodies in the future? * What is the future of virtual reality? * Will robots take our jobs? * Can we cure aging? Should we? * How do we fix the world?
