

For undergraduate/graduate-level courses in Twentieth-Century Techniques, and Post-Tonal Theory and Analysis taken by music majors. A primer—rather than a survey—this text offers exceptionally clear, simple explanations of basic theoretical concepts for the post-tonal music of the twentieth century. Emphasizing hands-on contact with the music—through playing, singing, listening, and analyzing—it provides six chapters on theory, each illustrated with musical examples and fully worked-out analyses, all drawn largely from the “classical” pre-war repertoire by Schoenberg, Stravinsky, Bartok, Berg, and Webern. Straus takes a paced, methodical, logical approach to each topic. He introduces it in context and—perhaps most significantly of all—uses language that is so transparent that merely to follow his descriptions, explanations and illustrations carefully is to understand each aspect of the theory under consideration. Mark Sealey, Classical.net
