Single Women & Cars
Women still experience gender discrimination when it comes to buying cars, which is surprising considering the fact that women buy about 60% of all brand new cars and about 53% of all used cars according to research! This shows that they buy more cars than men, but most car salesmen treat them badly when they go to car dealerships. It's not that they do not assist women buyers or they are rude at them. When women go to a car dealership searching for a new or used car that they want to buy, they are often treated with condescension or patronizing attitude by male salesmen. A lot of men think that women do not know much about cars and they often carry this condescending attitude when transacting with women. This causes women to think and feel as though they don't have a trustworthy salesperson or that they are not being treated fairly. As a female buyer, you can turn this disadvantage to your advantage by gaining more knowledge and information about cars—what to look for, tips for buying, and maintenance and repair! But for you to do that you need to take action! And this book is the right action to take! So move quick and hit click! Here Is What We Cover....
