

Algal World has been carefully written and edited with an interdisciplinary appeal and aims to bring all aspects of Algae together in one volume. The 22 chapters are divided into two different parts which have been authored by eminent researchers from across the world. The first part, Biology of Algae, contains 10 chapters dealing with the general characteristics, classification and description of different groups such as Blue Green Algae, Green Algae, Brown Algae, Red Algae, Diatoms, Xanthophyceae, Dinophyceae, etc. In it, it has two important chapters covering Algae in Extreme Environments and Life Histories and Growth Forms in Green Algae. The second part, Applied Phycology, contains 12 chapters dealing with the more applied aspects ranging from Algal Biotechnology, Biofuel, Phycoremediation, Bioactive Compounds, Biofertilizer, Fatty Acids, Harmful Algal Blooms, Industrial Applications of Seaweeds, Nanotechnology, Phylogenomics and Algal culture Techniques, etc.

Work Breakdown Structures for Projects, Programs, and Enterprises, How to Pick Winning Horses, A Treasury of Prayers, Big Color, Loves Beauty at the Heart of the Christian Moral Life: The Ethics of Catholic Theologian Hans Urs Von Balthasar, Etude historique des droits des enfants naturels reconnus dans la succession de leurs pere et mere et commentaire de la loi du 25 mars 1896 (French Edition), Human Sexuality: Responsible Life Choices, Bank on Yourself: The Life-Changing Secret to Growing and Protecting Your Financial Future, Le Roman Experimental (1890) (French Edition),
