Charlie and Drummond Clark are on the lam, hiding out in Switzerland near a clinic which is testing revolutionary treatments for Alzheimers on Drummond. With them is NSA operative Alice Rutherford, who has been working to exonerate them, but before she can make any headway, she is kidnapped by a terrorist group. To get her back, Charlie and Drummond are forced to plumb Drummonds damaged memory for the location of a secret cache of weapons, then turn over the most lethal of the lot. At the same time, they must find a way to thwart the terrorists before they can use the weapon for unspeakable destruction.
